Retention Policy Improvements

Items clean-out

- Mail can be retained for any number of days or years
- Domain wide settings can be overridden for individual users

POP3 server download

- Leave mail on POP3 server is now an option

The screenshot shows the 'Edit User' dialog box with the 'Messages' tab selected. The 'Items clean-out' section is expanded, showing options to use domain settings or custom settings. The custom settings section includes checkboxes for deleting old items in various folders, with a dropdown menu for selecting the unit (days or years).

Edit User

General | Email Addresses | Forwarding | Groups | Rights | Quota | Messages

This user can send/receive email to/from his/her own domain only

Maximum message size

Use the limit defined for this domain

Limit outgoing message size to (overrides the domain limit): MB

Do not limit message size

Items clean-out

Use the settings defined for this domain:

Use custom settings for this user

Permanently delete old items in:

Deleted Items folder, items older than: days

Junk E-mail folder, items older than: days

Sent Items folder, items older than: days

All folders except contacts and notes, items older than:

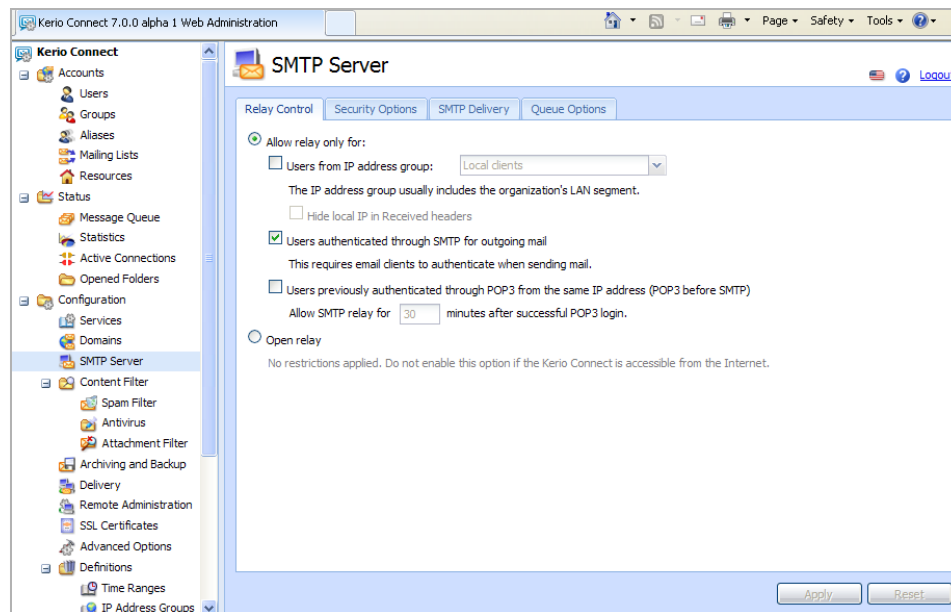

days
years

OK Cancel
