

## MX Logic® Email Defense Service **MX Perimeter Defense<sup>SM</sup>**

**Spam now accounts for more than 85% of all email traffic.**

MX LOGIC® THREAT CENTER

**93% of organizations have had a virus, worm or Trojan Horse successfully infiltrate their network through email.**

OSTERMAN RESEARCH, INC.

The MX Logic® Email Defense Service offers several services to provide businesses worldwide with a variety of email defenses using a combination of proven spam filters, leading anti-virus engines, fraud protection, content filtering, and email attack protection. Our easy-to-administer network perimeter-based service identifies, blocks and strips suspect email messages before they can enter or leave your organization's messaging infrastructure.

### **MX PERIMETER DEFENSE<sup>SM</sup>**

MX Perimeter Defense is an ideal first-line of defense for businesses – particularly those looking to reduce the load on their existing on-premises anti-spam solution. Customers will benefit from drastically reduced bandwidth, storage and power consumption and will be able to deploy the solution immediately without additional hardware requirements, further extending the life of their existing email security appliance.

### **MX PERIMETER DEFENSE FEATURES**

MX Perimeter Defense is a simple, inexpensive, easy to add-on, upfront solution that minimizes the stress put on existing on-premises solutions:

**Perimeter Filtering** – Protects your network with a powerful filtering system whereby all incoming messages must enter. The Perimeter Filtering system compares a message's sending address with known spammer address located in the MX Logic Threat database and immediately denies connection for all perpetrators. This process alone results in more than 60% decrease in inbound email traffic.

**WormTraq®** – This MX Logic proprietary technology identifies and intercepts zero-hour mass mailing worms before they enter a corporate network, and two industry-leading signature-based anti-virus engines.

**Email Attack Protection** – Conceals your network and critical messaging gateways from attack. Instantly blocks denial of service and other SMTP-based attacks, including dictionary harvest attacks, email bombs and channel flooding.

## ADDITIONAL SERVICE FEATURES

The MX Perimeter Defense package also includes support and services to help you keep your overall email network reliable and running efficiently. With this package, you'll also benefit from:

**Automated, around-the-clock threat monitoring and protection** – The MX Logic® Threat Center is a sophisticated streaming data environment where MX Logic monitors global email traffic 24 hours a day, seven days a week, and provides its customers with real-time updates and protection.

**Account provisioning and configuration support** – The MX Logic Provisioning team will work with you to activate and configure your account.

**Dedicated customer service** – The MX Logic Customer Support Services team is available to answer your account and billing questions via a toll-free phone number or online eService, 24 hours a day, seven days a week.

## FORTIFY YOUR EMAIL DEFENSE

For those organizations that do want to explore the managed service security approach, MX Perimeter Defense is a win-win. It further enhances the life and performance capabilities of the current on-premises solution while allowing the user to experience the ease and effectiveness of a managed services security solution.

If your business is looking to further protect the integrity of your network, MX Logic has several email defense service packages that leverage our feature-rich highly reliable service to successfully keep more than 99% of destructive messages out of the business environment. The MX Logic Email Defense Service is packaged and priced in four additional solution packages:

**MX Ultimate Access<sup>SM</sup>** – Our most comprehensive email security package, MX Ultimate Access offers all of the email defense features found in MX Ultimate Defense and MX Critical Defense, and adds MX Logic® Message Continuity, which provides Web-based email access, management and use during outages.

**MX Ultimate Defense<sup>SM</sup>** – This package includes all of the features and benefits found in the MX Critical Defense offering, while also integrating Outbound Message Filtering and the MX Logic® Fail Safe Service.

**MX Critical Defense<sup>SM</sup>** – This package provides comprehensive email protection by incorporating Spam Blocking, Virus and Worm Scanning, Fraud Protection, Content and Attachment Filtering, and Email Attack Protection.

**MX Enterprise Defense Plus<sup>SM</sup>** – This package gives organizations the ability to customize their email defense by purchasing the base MX Enterprise Defense Plus service package, which includes Spam Blocking, Fraud Protection, Content and Attachment Filtering, and Email Attack Protection, and adding modules to the package as needed. Add-ons include zero-hour spam protection via the Premium Anti-Spam Multi-Language Filter, Double or Triple Virus and Worm Scanning, Outbound Message Filtering, MX Logic Message Continuity and the MX Logic Fail Safe Service.

## AWARD-WINNING SERVICE

Our innovative service was honored as the *Best Managed Email Service* in the 2006 SC Magazine Reader Trust Technology Awards, and was selected as a *2005 Product of the Year* by SearchExchange.com. In addition, the Email Defense Service was awarded the highest available rating of five stars in the VeriTest Anti-Spam Benchmark Service Summer 2005 Report, in the vendor-tuned portion of the test.

## ABOUT MX LOGIC
